EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Marcus Risso on Thursday, April 17, 2008.

The application has been amended as follows:

- ***Claims 20-22 are canceled.***

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding independent ***claims 1 and 10,***

The claimed invention is aimed at providing a method and apparatus for filtering data and categorizing the data by contextual relevance, whereby the contextual relevance includes:

- general interest,
- alarm type data which is location specific whereby a notification is sent to a user when entering into a particular situation or environment, and
- notifying of an anomaly-based notification.

The Applicant has such claimed,

- An apparatus for providing context sensitive dynamic data via wireless networks comprising: an information source element configured to provide data to a data service element which uses the provided data to register with a directory service element; and wherein a client subsequently requests a service from a directory service polling sub-element, which sends a lookup query to the directory service which, in turn provides services matching those requested by the client, to a candidate service filtering sub-element, where candidate services are isolated, and are submitted to a target service filtering sub-element; where target services are isolated and provided to the client and the isolated candidate services serve as the basis ***for registering the client's interest with a client update decision sub-element and the client update decision sub-element provides an updated service entry of candidate services to the target service filtering sub-element*** and the directory service update decision sub-element provides an updated service entry to the directory service.

The closest prior art relevant to the claimed invention:

Owensby - U.S. Patent Number 6,647,257 - System and Method for Providing Targeted Messages Based on Wireless Mobile Location

Owensby teaches delivering messages/services, i.e. commercial information or advertisements, into wireless mobile communication device. The message/services are targeted to the user based on location of the device at the time of the wireless communication, demographic and predetermined personal preference data pertaining to the user and user's responses made from the previously sent messages/services or historical movement of the user. Owensby teaches that the messages are chosen from

a database of pre-selected commercial information and are targeted to the user.

Owensby further teaches that the user's personal preferences are registered at the time the user registers with the operator of the wireless mobile communication.

Although Owenby is considered to constitute to the state of the claimed invention, in contrast with comparable differences, the instant Application is considered novel over the Owensby because the data is dynamically updated and the user receives contextually relevant data despite the changing position. The instant Application teaches of the dynamic registering of the client's interest with a client update decision sub-element which further provides, as an input, to the said target service filtering sub-element whereby services are isolated and sent to the said user.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a.) U.S. Patent Number 6,424,888 B1 – Call Response Method for a Vehicle

b.) U.S. Patent Number 6,259,990 B1- Information Processing Apparatus and Pedestrian Navigation System Using the Same

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
